Education

R V Institute of Technology and Management

B.E. in Computer Science and Engineering

2023 – 2027 | CGPA: 8.75

Vijaya Composite PU College

PUC, Class XII

2023 | 96.6%

Aradhana Academy

ICSE, Class X

2021 | 96.5%

Experience

goAI Solutions – AI Engineer Intern (On-site)

Jun 2026 – Present

- Design and deploy LLM-powered features and agentic pipelines for production applications, collaborating with cross-functional teams to translate business requirements into AI-driven solutions.
- Build and evaluate prompt engineering strategies and retrieval-augmented generation (RAG) workflows to improve response accuracy and reduce hallucination rates.
- Contribute to model integration, testing, and optimization efforts to improve inference latency and reliability across deployed AI services.

ANNAM.AI & IIT Ropar – MERN Stack Development Intern (Remote)

Feb 2026 – May 2026

- Built full-stack web applications with the MERN stack (MongoDB, Express.js, React, Node.js), implementing REST APIs and database integration.
- Developed responsive React interfaces backed by Node.js and Express services using Git version control and full-stack debugging workflows.

Projects

CareerFlow – AI-Powered Job Search Agent

GitHub | Live

React, FastAPI, LangGraph, Docker Compose, GitHub Actions CI/CD

- Built and shipped a production AI job search agent using FastAPI and LangGraph agentic workflows, deployed via automated CI/CD (GitHub Actions to Vercel and Render).
- Designed LLM-driven job description parsing and candidate ranking with LangGraph state machines, achieving sub-second scoring per query across separated preview and production builds.

BlockSeat – Blockchain NFT Ticketing Platform on Polygon Amoy

GitHub | Live

React, Node.js, Solidity, Hardhat, Polygon Amoy

- Developed a blockchain-based NFT ticketing system on Polygon Amoy to prevent scalping and enable secure, verifiable ticket ownership.
- Implemented capped resale limits, non-transferable seats, OTP-based authentication, Razorpay payment integration, and TOTP QR-based gate validation for fraud-resistant entry.

VahanConnect – Vehicle Owner Messaging Platform

GitHub | Live

React, Node.js, Express, MongoDB, Socket.io, JWT

- Built and deployed a full-stack MERN platform for plate-number-based owner lookup with real-time in-app messaging (Socket.io), without exposing personal contact details.
- Designed a privacy-preserving architecture enabling owner contact via in-app messaging for scenarios like blocked parking and emergencies.

Technical Skills

- **Languages:** Java, Python, C++, JavaScript, TypeScript, Kotlin
- **Backend:** FastAPI, Flask, Node.js, Express, REST APIs, Redis
- **Frontend:** React, HTML, CSS
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools:** Docker, GitHub Actions (CI/CD), Vercel, Render, Git

Positions of Responsibility

- **Senior Board Member** – Phoenix Robotics Club, RVITM
- **Event Coordinator** – CodeBattle National Coding Competition (2024)
